Full-Stack PHP Developer with 4+ years of commercial experience building and maintaining scalable web applications using PHP, Symfony, Vue.js, React and Drupal. Experienced in developing high-traffic marketing platforms, business applications, REST APIs and complex monolithic systems. Strong background in backend development, frontend integration, legacy system modernization and database-driven applications. Comfortable taking ownership of features throughout the entire development lifecycle, from technical implementation to production deployment.

Proffesional Experience

Full-stack developer

Sygnisoft SA

08/2022 - Present

Developed and maintained high-traffic campaign websites for international PepsiCo brands, including Lay’s, Pepsi, Cheetos, Chrupstar and PopWorks. Delivered large-scale marketing campaigns such as Pepsi Space, Pepsi Titan and Smakuj Lato, working across both frontend and backend with Symfony, Drupal and Vue 3.

Developed and maintained a large monolithic platform supporting marathon registration, participant management and internal back-office operations. Implemented new features, improved existing functionality and worked closely with stakeholders to deliver reliable solutions using Symfony and Vue 3.

Maintained and enhanced the official Logos Tour website, focusing on performance, stability and long-term maintainability. Developed new features and improved existing functionality using Symfony and Vue.

Built and maintained websites for major sporting events, including Maraton Warszawski and Ekiden. Developed new features, integrated WordPress plugins and contributed to ongoing improvements using WordPress and React.

Maintained and supported multiple legacy applications while contributing to their gradual modernization. Refactored existing code, implemented new features and migrated parts of the systems to modern technologies using Symfony, Vue3 and React.
